

INSPIRATION  
COMMITMENT  
SIMPLICITY

#### INSPIRATION

We are inspired by technology and law. We are inspired by clients and associates. We strive to inspire you.

#### COMMITMENT

We are committed to defending our clients' interests. We are committed to successful prosecution.

#### SIMPLICITY

Our approach is thorough, yet prompt. We aim to keep things simple.

#### COMPETENCE, CONFIDENCE AND COMMITMENT

As a client at Inspicos, you first and foremost appreciate that your company's IP strategies are tailored and implemented on the basis of a profound understanding of your business objectives and innovation targets.

All our professionals are European Patent Attorneys with an average seniority in the IP profession of about 20 years. Furthermore, all our professionals hold a university degree in science or technology.

We represent clients before all instances of the European Patent Office, including the Examining and Opposition Divisions as well as the Boards of Appeal.

These competencies, along with our experience and commitment, guarantee that you are provided with consultancy at the highest level and that you obtain the reassurance of quality and experience.

Our comprehension of law and technology ensures that every single case is handled in a professional and tailored manner. This means that each assignment is thoughtfully executed from beginning to end, whilst ensuring that utmost care is taken not to make things more complicated than necessary.

We adjust our counselling to each client's needs and wishes. At the same time, we have the qualifications and the courage to test and move borders of patent practice. As our client you will experience competence, confidence and commitment.

#### EUROPEAN PATENT ATTORNEYS AND MORE

All of Inspicos' professionals are European Patent Attorneys and have extensive experience in EPO prosecution and opposition practice as well as international patent enforcement disputes.

All our professionals hold a university degree in science or technology, and several have previously held positions as Intellectual Property Directors in R&D-based and listed enterprises.

The majority of our professionals have acquired an additional qualification with the aim of obtaining the right to representation before the Unified Patent Court. Some of our most experienced European Patent Attorneys serve as court-appointed experts or ad-hoc judges before the Danish courts on a regular basis.

#### CARE AND PROMPTNESS

Inspicos is wholly owned and managed by the partners of the firm, and we solve every assignment entrusted to us with uncompromising care and promptness. Among our clients are several of Denmark's largest and most reputable industrial corporations as well as a number of international R&D-based enterprises and several universities.

#### WE SPECIALISE IN:

- Strategic patent consultancy
- Drafting of patent applications
- EPO prosecution, oppositions and appeals
- Prosecution and administration of patent applications globally
- Invalidity actions and oppositions
- National and international lawsuits
- Patentability studies and novelty searches
- Enforcement and commercialisation of rights
- IP due diligence
- Freedom-to-operate analyses

#### WE UPDATE OUR KNOWLEDGE

At Inspicos, you are offered knowledge of patent law at the highest international level. At any given time, our consultancy reflects the state of the art of legal development and understanding. Indeed, this is reflected in the fact that several of our professionals lecture at leading intellectual property institutions, for example at CEIPI (Centre d'Etudes Internationales de la Propriété Industrielle) and DIFI

(Danish Institute for IPR Training), and also as part of university courses. We are tutors for future European Patent Attorneys at courses in Denmark, Germany and France.

#### TECHNOLOGY AND LAW

All Inspicos' professionals hold a university degree in science, and all of them have additionally qualified as European Patent Attorneys. We have extensive experience within the following fields of technology:

- Biotechnology
- Molecular biology, including recombinant DNA technology and gene technology
- Cell biology
- Stem cell technology
- Drug discovery
- Protein chemistry
- Human and veterinarian medicine and diagnostics
- Immunology, including vaccine technology, immunoassays and antibody technology
- Enzyme technology
- Plant technology

- Organic and inorganic chemistry
